OBJECTIVE

Ambitious Software Engineering student with a deep interest in Distributed Systems, Network Security, and Internet-scale infrastructure. Proficient in multiple Programming languages including Java, Python, and C, with a strong foundation in Data Structures and algorithms. Experienced in Full-Stack Web development and dedicated to solving complex technical challenges through collaborative, high-quality engineering.

EDUCATION

Chennai Institute of Technology, Anna University

Bachelor of Engineering in Computer Science Engineering

CGPA: 8.4 / 10

Aug 2023 – May 2027

Chennai, Tamil Nadu

WORK EXPERIENCE

StudAI One

Full Stack Developer Intern

Jan 2025 – Mar 2025

Chennai, Tamil Nadu

- Built and optimized responsive front-end interfaces using React and Tailwind CSS, focusing on delivering a seamless, user-first dashboard experience.
- Maintained modular RESTful backend APIs for subscription workflows; ensured high data consistency and secure authentication using JWT while adhering to clean coding practices.

Chennai Institute of Technology

Software Research Intern

Nov 2024 – Dec 2024

Chennai, Tamil Nadu

- Engineered and automated end-to-end AI workflows by utilizing Python scripts for sophisticated data processing and transformation, resulting in a 92% accurate currency identifier and a 40% faster recyclable object detector.
- Integrated the Google Text-to-Speech API with a custom-trained CNN model to provide real-time audio feedback, demonstrating the ability to build inclusive, user-first AI solutions for accessibility.

PROJECTS

Decentralized Safety Evidence Locker | Next.js, Solidity, IPFS, Polygon Amoy, Pinata, Metamask

- Full-stack dApp using Next.js and Solidity to create a tamper-proof evidence locker on the Polygon Amoy.
- Integrated IPFS for decentralized media storage, prevent unauthorized changes. Optimized smart contracts to minimize gas fees while maintaining immutable logs for high-security evidence retrieval.

Indian Currency Identifier | TensorFlow, NumPy, Matplotlib, Pandas, Python, Google TTS

- Fine-tuned an Indian currency recognition model using CNNs and TensorFlow Lite for real-time use on low-power devices.
- Addressed accessibility for visually impaired users, inspired by an RBI hackathon problem statement.

Online Food Order System | JavaScript, ReactJS, RESTful API, HTML, Tailwind CSS

- Built a responsive food delivery app with React and Tailwind CSS, integrating live APIs for real-time restaurant data and reviews.
- Enhanced search, filter & UI performance using React Hooks and Fiber, boosting user retention by 25%.

TECHNICAL SKILLS

Web Dev: React.js, Tailwind CSS, HTML, CSS, JavaScript, Next.js, FastAPI, Express.js, Node.js, UI/UX

App Development: Android Studio, React Native

Programming Languages: Java, Python, C, **Dev Tools:** Git, GitHub, Visual Studio Code, Postman, Remix IDE

Database: SQL, MongoDB

ACHIEVEMENTS & CORE COMPETENCIES

- Finalist @ Hackfusion'24 (Intra-college Hackathon) — Leadership & Team Management (Mar 2024)
- Finalist @ I Love Hackathon (Chennai Edition) — Agile Analytical Teamwork (Nov 2024)
- Presenter @ ICSCAN'24, IEEE Conference — Public Speaking & Documentation Skills (Dec 2024)
- Attended @ FOSSHACK 2025 — Open-source Collaboration (Mar 2025)
- Solved 550+ DSA problems on LeetCode — Highest Rank: 533 | Contest Rating: 1850+
